across arms, wearing breeches.
Although launched into a well established market of small military figures and equipment models, System 12 brings to it a completely new multi-dimensional concept backed by a company name synonymous with top design and quality through out the world.

As its name implies, System 12 is a system, a complete and all embracing system in which the figures themselves, the figure collector, the diorama builder or those who wish to produce a 1/150th scale model can satisfy all aspects of the subject.

Manufactured from the highest grade of alloy, it is now possible to obtain not only the figures in metal but also all the accessories that one associates with the hobby - all to constant scale - all in System 12. Horses and flags, roads and town scenes, fences and buildings, grass and1/150th scale plants, are all provided to enable the enthusiast to be able to create his own many and varied dioramas.

Take a 15th of an inch brick, make it 12mm high and that is System 12.

System 12 is based on an approximate scale of 2mm = 1 ft. Very comparable to 'N' gauge and 1/150 scale.

Take a 15th of an inch brick, make it 12mm high and that is System 12.
